

## GIZ Sustainability and Partner Capacity Framework (Seed)

### Sustainability dimensions

- Institutional: partner organizations formalize processes and assign accountable roles.
- Financial: routine delivery costs are integrated into partner planning cycles.
- Technical: trainers and service teams maintain competencies after project support.

### Capacity strengthening principles

- Embed coaching and peer learning in implementation cycles.
- Transition responsibilities progressively to partner institutions.
- Validate operational readiness before scale-up.

### Risk management cues

- Staff turnover can reduce implementation consistency.
- Policy or governance shifts can delay institutional adoption.
- Data quality gaps can weaken performance reviews.
