

## Q3 Widget Launch | Bug Report | Export crash

Filed by: QA Team

Repro steps:

1. Open the widget designer.
2. Build any composition with more than 10 widgets.
3. Click Export to CSV.
4. The export hangs for 30 seconds, then the app crashes.

Severity: blocker. We can't ship this to enterprise with the export crash in place. Customer impact is severe; the export path is the #1 use case for the design-review workflow.

Owner: Platform team. Tracking under this `lc_task`.
